

**Mendon Pediatrics patients:**

Please take a moment to review the progress we have made at Mendon Pediatrics over the past few months:

In April 2017, we purchased a NIOX machine to track FENO values for our patients diagnosed with asthma.

	A	B	C	D
1	Number of patients Screened with NIOX		Number of patients seen with diagnosis of Asthma	Total percentage
2	Mar-17	0	34	0
3	May-17	22	45	49%

Mendon Pediatrics assesses appropriate testing for children with pharyngitis as one of their utilization measures in order to control overall health care costs. The patients included in the measure are those patients diagnosed with pharyngitis where a strep test is completed.

	First quarter 2017	First quarter 2017	
Provider	Patients diagnosed with pharyngitis	Rapid strep test performed on patients with diagnosis of pharyngitis	Overall Percentage
DDM	229	148	64.63
JSL	158	155	98.10
RDG	117	96	82.05
JTB	19	18	94.74
<b>Overall Practice:</b>	<b>523</b>	<b>417</b>	<b>79.73</b>
